HARDY EVERGREEN TREES

Fresh dug for each order, we do not handle peddler stock, which is really dead before planting. Insist on fresh dug evergreen trees, dug with a ball and burlapped. Keep them out of wind and sun until planted. Dig hole deep and wide enough easily to admit the earth ball. If you cannot plant immediately keep them in cool place with burlap wet: dip in tub of water for a few minutes before planting.

Junipers—One of the hardiest groups of Evergreens:

We plan and plant at additional cost and would be glad to make you an estimate, with full loss guarantee.

HARDY GRAFTED NUT TREES

These are budded and grafted varieties, the very finest large meats, excellent flavor and have proven hardy to withstand our climate. We have for years grown chestnuts for market and make a specialty of growing Nut trees, which besides producing fine nuts make the very best of Shade and Ornamental trees and should not be neglected and overlooked by home owners and planters.

CHINESE BLIGHT Resistant Chestnut—Trees grow fast and bear almost as soon as peaches, and produce profitable crops of nuts of the sweetest and best quality. Bloom late and bear each and every year, never getting froze out. Is a good commercial proposition as we have proven by our bearing trees.
